

To whom it may concern,

Ovidiu Moga and his team from Webtouch provided Phillips Collection with a superb industry leading app. Their innovative and comprehensive tool is clean and intuitive enough to be embraced by our nontechnical furniture reps and salespeople. They delivered all we asked for on time and in budget.

A few professional comments about the app and our experience:

1. Very well designed software architecture
2. Clean code according to cu software standards
3. Excellent analytical skills and understanding of business requirements
4. Good support after product development.

I would not hesitate to recommend this team.
Please feel free to contact me if you need further elaboration.

Best regards,

Mark Phillips
